

INCOMING TRAINING EXPERIENCE IN ITALY

LEARNERS

Our Company

The deep bond between the Scuola Centrale Formazione and its network of a 100 VET centres, located in 11 regions, led ITACA to develop a strategy to manage and organize the internships' experiences in Italy: a strategy that takes into consideration the personal needs and growth of young participants.

Working within the Vocational Education and Training (VET) context, and realizing many of its strategic objectives through the international cooperation, the strategy of Scuola Centrale Formazione and Itaca is inspired by the communitarian politics that aim at promoting the internationalization of education, and specifically by the Bruges' communique, which designs strategical objectives (2011-2020) concerning the internationalization of IeFP, and by the Europa 2020 strategy.

A good amount of attention has been therefore reserved from SCF, and specifically to the educational and vocational pathway, that students, trainers and teachers carry on at their arrival in Italy. Thanks to the active integration of its own associative network, the logistic organization of the transnational mobility's experiences in Italy passes through Itaca Cooperative that completes the formative offer of SCF granting a package of necessary logistic services.

SCF Model

The purpose of SCF is to organize quality professional internships, that display a sustainable welcoming experience through the promotion of reciprocity in the formative mobility. The SCF model is characterised by the cooperation with the VET centres that belongs to their own associative network and that made themselves available to welcome in their structures students and trainers coming from all over Europe, giving them the possibility to practice their professional internships and job-shadowing experience at specialised companies of the respective territories, acquiring and strengthening their own professional and social capacities.

The training activities of the members of SCF include several target's typologies: youngs, adults, workers, people with special needs and they offer a wide range of selection for who desire to accomplish a formative transnational experience in Italy.

The Incoming activities see the involvement of the Federazione Associazioni Rurali Italiane (FARI) to which SCF adheres, which is constituted by organisations committed to initiatives and activities connected to the rural development, vocational education, cooperation towards development and social and working integration.

PREPARATION (HOW)

SCF incredibly believes in the importance of preparation towards the training mobility experience, as a consequence, it entails virtual interaction -previous departure- through skype, finalised to the preparation of the interns, to better fulfil the expectations and define an efficient and adapt training program.

PROFESSIONAL INTERNSHIPS

Once received the cv's of the interns, one selects the hosting CFP that begins the research of the companies, on professional-based level, of the linguistic competences, of previous working experiences and personal attitudes.

MONITORING

Every association has to identify within their own structure a tutor, a point of reference for the interns and responsible of the tutoring activity and monitoring of the entire mobility experience.

EVALUATION AND FOLLOW UP

A *Welcome Meeting* will be organized at the arrival of the participants, during which the interns will receive a welcome kit, containing tools to evaluate (an evaluation card whose participant is responsible for and another one whose company is responsible for and a mobility diary) that will enable a constant monitoring and a careful evaluation on the mobility pathways.

CERTIFICATIONS AND FINAL DOCUMENTATION

At the end of the mobility experience, SCF and Itaca deliver a **participation certification** to the interns, signed by the hosting company.

SCF and Itaca, collaborating with the hosting CFP, redact a **final report** which contains all the information on the mobility experience and cooperate to redact and validate the **Europass Mobility's certifications** together with the sender agency.

They belong to **Scuola Centrale Formazione VET** centres in the north, central and south of ITALY. A total of 45 member institutions operating in 11 regions .

BOLOGNA

Bologna is the council of the homonymous metropolitan city and of the Emilia-Romagna county. Is the seventh most populated Italian council and it is the seat of the most ancient University of the western world.

TREVISO

The province of Treviso is a territory deeply marked by the waters of the rivers Piave, the Sile and the Livenza with their evocative river landscapes that intertwine with the gentle hills and the green countryside dotted with elegant noble residences. A land whose capital - Treviso - is declaimed by the poets as a "courteous city", is a land where one breathes an atmosphere of calm and serenity, the same that, in the eighteenth century, led the Venetian aristocracy to choose Treviso as ideal vacation spot. Of great naturalistic impact is the Regional Natural Park of the Sile, which stretches along the entire length of the river along which different landscapes wind: wet and marshy areas close to the source, tortuous and violent stretches near the capital and lagoon landscapes in the near the mouth. The northern Marca, where the Piave marks the border with Belluno, is the land of wine, with the long rows of vines that cover most of the territory and the important wine production centers of Conegliano and Valdobbiadene.

The host VET Centre in this county:

- **Fondazione Opera Monte Grappa - Fonte**

TRENTO

Trento is an Italian council, county seat of the homonymous province of Trento and of the Trentino- Alto Adige regione. Trento represents extreme territorial diversities, and also population-related.

The city population is not centered only in the city, but also in several scattered centres and suburbs, very different from each other, and they still maintain a proper identity, urban, non-urban, rural and mountain.

Trento started as an industrial city to the centre of Service Sector with a well-established industrial activity in the peripheral area of North Trento and a wide agriculture activity (apple and grape) in the countryside of the suburbs of South Trento.

Tourism is hugely central as well (cultural-wise and hiking-wise). The richest and more proficuous sector remains nonetheless the commercial one.

The host VET Centre:

. Artigianelli Institute for Graphic arts

Istit. Pavoniano ARTIGIANELLI per le arti grafiche

SHORT DESCRIPTION OF THE VET CENTRE

The Artigianelli Institute for graphic arts in Trento is based on the educative experiences of a value system, proper of the Congregation founded in 1847 by the holy L. Pavoni, Brescian priest who devoted his life to the less-fortunate adolescents, founding the first graphic school in Italy, precisely in Brescia in 1821. In this structure, in agreement with the autonomous province of Trento, religious and secular people offer a vocational proposal for young and adolescents which aims at fulfilling the formation of the individual in all of its components; cognitive, emotional, religious, relational, rational and of values.

A VET centre, a pathway of high-quality graphic training, an innovative academic laboratory, two cooperatives and a cartoon multinational company all coexist within the Artigianelli. This Institute is supported actively by a network of collaboration such as high-schools, universities and public authorities, various companies and important centres for research and innovation.
